July 14, 2020

Subject: **Current Surcharge**

**DUCTILE IRON \$ .2342/ #**

**GRAY IRON \$ .2239/ #**

The current cost, base cost, amount of change, and formulas used to calculate our metal and energy surcharges are noted below.

	Current Cost	Base Cost	Amount of Change	Surcharge Amount
Ductile	<b>\$543.10</b>	\$ 100.00	<b>\$ 443.10</b>	<b>\$ .1859/#</b>
Gray	<b>\$515.13</b>	\$ 96.79	<b>\$ 418.34</b>	<b>\$ .1756/#</b>
Energy - Gas	<b>\$ 2.80</b>	\$ 3.610	<b>\$ (0.81)</b>	<b>\$ (.0005)/#</b>
Energy - Electric	<b>\$ .0778</b>	\$ .0290	<b>\$ .0488</b>	<b>\$ .0488/#</b>

Metal Calculation: Amount of change divided by 2240 (pounds per gross ton) multiplied by .94 (percent of charge that is metal) = metal surcharge per pound.

Energy Calculation:

Gas - Amount of change multiplied by 0.0006112 (MMBtu of gas used per pound of good castings)

Electric - Amount of change multiplied by 1 (KW of electricity used per pound of good castings) = energy surcharge per pound.

The **effective date** for the surcharges noted above will be July 20, 2020.

Sincerely,  
Richard Bean  
Director of Sales & Marketing
